

ISTA Biodiversity Campus

Fascination Plant Day Walk

Isabella Klebinger

Host: Jeroen Dobbelaere

As part of the biodiversity project on campus we will focus on the plants on campus and try in a very hands on way to discover, monitor and photograph plants on campus. According the Stockholm resilience center biodiversity is one of the most critical factors affected by climate change. Last year we started our Biodiversity Project at ISTA and now that the weather is getting nicer, we would like to continue this journey. Key objectives Find native and exotic plants on campus. Learn how to document and name plants. Design monitoring project using iNaturalist. Learn about plant insect interactions. Isabella Klebinger from Öko Campus Wien will guides us around campus and tell us about the plants and animals. Isabella is an expert in biodiversity in urban areas and also active at this year Klimabienale Wien as artist ([link](#)) and activist ([link](#)). Isa Klee, Artist, citizen scientist, spatial planner, activist and. Initiator of Öko Campus Wien @endangeredspeciesadvocacy
