

Colloquium

Cellular Logistics: Membrane Trafficking and Signaling in Health and Disease

Marta Miaczynska

International Institute of Molecular and Cell Biology

Host: Carrie Bernecky

Endocytic pathways mediate uptake of extracellular cargo and critically regulate receptors for growth factors and cytokines to maintain proper control of cell proliferation, survival, and differentiation. Dysregulation of endosomal trafficking and the ESCRT machinery affects inflammatory responses, lysosome biogenesis, and metabolic homeostasis, creating vulnerabilities relevant for cancer therapy. Work on signaling endosomes and macropinocytic uptake driven by oncogenic receptor tyrosine kinases such as AXL underscores the role of endocytic regulation in tumor progression, metastasis, and precision medicine-oriented interventions. Prof. Micizska will willingly meet (if they are available): Carrie Bernecky; Carl-Phillip Heisenberg; Martin Hetzer; Andela Saric; and Michael Sixt. In addition, she is open to any other scientists who will be eager to talk to her

Monday, February 16, 2026 11:30am - 12:30pm

Raiffeisen Lecture Hall

This invitation is valid as a ticket for the ISTA Shuttle from and to Heiligenstadt Station.

Please find a schedule of the ISTA Shuttle on our webpage:

<https://ista.ac.at/en/campus/how-to-get-here/> The ISTA Shuttle bus is marked ISTA Shuttle (#142) and has the Institute Logo printed on the side.
