

Colloquium

An insider's view of Nature journals

Alberto Moscatelli

Nature Nanotechnology

Host: Rafal Klajn

Abstract: In this talk, I will present the general editorial line of Nature Nanotechnology. We pride ourselves to be the most interdisciplinary journal in the Nature Research portfolio, but what do we mean by interdisciplinarity? We will examine broad areas cutting across the sciences that make doing nanoscience research so exciting. We will discuss the elements of a good paper, as well as the mindset of a Nature Portfolio editor when assessing a manuscript. I will conclude with a set of recommendations for writing better papers and construct a more compelling story.
