# Long Night of Research

Host: Lange Nacht der Forschung

Curious about how scientists explore the world around us? Join us from 5:00 to 11:00 pm for an evening of discovery during the Long Night of Research. At our campus in Klosterneuburg near Vienna, visitors of all ages are invited to step inside the world of research and experience science in a welcoming, open-door atmosphere. Families, school groups, and anyone with a curious mind can explore interactive stations, meet researchers, and see how scientific ideas come to life. Across 14 interactive stations, guests can enjoy hands-on experiments, short talks, and engaging demonstrations. Highlights include a lively Science Show filled with exciting chemistry experiments, the AstroLab, where visitors can explore stars and galaxies and even build a mini spectroscope, and the colorful Rainbow Liquid Tower, where liquids stack to reveal the science of density. You can also test climate strategies in the Hotspot Earth game, investigate animal science at CSI Vetmed, or discover what birdsong can reveal about the origins of music. At the VISTA Science Experience Center, explore the exhibition Science in the Making, join family activities, and watch the film Encounters in the Milky Way. You can find more information about the program here: <https://langenachtderforschung.at/ausstellungsstandort/15> Take advantage of the free shuttle bus from Vienna Heiligenstadt and Tulln to ISTA, or the additional event shuttle bus with the following times:

**Friday, April 24, 2026 05:00pm - 11:00pm**

Raiffeisen Lecture Hall, Central Building & VISTA Science Experience Center

This invitation is valid as a ticket for the ISTA Shuttle from and to Heiligenstadt Station.

Please find a schedule of the ISTA Shuttle on our webpage:

<https://ista.ac.at/en/campus/how-to-get-here/> The ISTA Shuttle bus is marked ISTA Shuttle (#142) and has the Institute Logo printed on the side.
