

## Seminar/Talk

# Abelianisation of Logarithmic $\mathfrak{sl}(2)$ -Connections

**Nikita Nikolaev**

Université de Genève

Host: Tamas Hausel

I will describe an approach to studying meromorphic connections on vector bundles called abelianisation. This technique has its origins in the works of Fock-Goncharov (2006) and Gaiotto-Moore-Neitzke (2013), as well as the WKB analysis. Its essence is to put rank- $n$  connections on a complex curve  $X$  in correspondence with much simpler objects: connections on line bundles over an  $n$ -fold cover  $\Sigma \rightarrow X$ . The point of view is similar in spirit to abelianisation of Higgs bundles, aka the spectral correspondence: Higgs bundles on  $X$  are put in correspondence with rank-one Higgs line bundles on a spectral cover  $\Sigma \rightarrow X$ . However, unlike Higgs bundles, abelianisation of connections requires the introduction of a new object, which we call the Voros cocycle. The Voros cocycle is a cohomological way to encode objects such as ideal triangulations that appeared in Fock-Goncharov, spectral networks that appeared in Gaiotto-Moore-Neitzke, as well as the connection matrices appearing in the WKB analysis. By focusing our attention on the simplest case of logarithmic singularities with generic residues, I will describe an equivalence of categories, which I call the abelianisation functor, between  $\mathfrak{sl}(2)$ -connections on  $X$  satisfying a certain transversality condition and rank-one connections on an appropriate 2-fold spectral cover  $\Sigma \rightarrow X$ . This presentation is based on the work completed in my thesis (2018) and recent extensions thereof.

**Thursday, October 18, 2018 01:30pm - 03:30pm**

Big Seminar room Ground floor / Office Bldg West (I21.EG.101)

This invitation is valid as a ticket for the ISTA Shuttle from and to Heiligenstadt Station.

Please find a schedule of the ISTA Shuttle on our webpage:

<https://ista.ac.at/en/campus/how-to-get-here/> The ISTA Shuttle bus is marked ISTA Shuttle (#142) and has the Institute Logo printed on the side.
