

Seminar/Talk

Chasing hypergeometric motives

Fernando Rodriguez Villegas

ICTP Trieste

Host: Tamas Hausel

I will discuss how to realize concretely the motives of the title in various cases, for example, the case of cubic threefolds, and how their properties are manifested in the associated geometry. In the first part of the talk I will go over the definition and basic properties of hypergeometric motives in a very down-to-earth way, including what a down-to-earth motive means (to me).

Thursday, November 15, 2018 01:30pm - 03:30pm
Big Seminar room Ground floor / Office Bldg West (I21.EG.101)
