Rational points over global fields and applications.

Pankaj Vishe
Durham University

Host: Tim Browning

We present analytic methods for counting rational points on varieties defined over global fields. The main ingredient is obtaining a version of Hardy-Littlewood circle method which incorporates elements of Kloosterman refinement in new settings.

Thursday, March 14, 2019 01:00pm - 03:30pm
Big Seminar room Ground floor / Office Bldg West (I21.EG.101)
