Seminar/Talk

(Twisted) Derived Categories of bielliptic and Enriques surfaces

Sofia Tirabassi

University of Bergen and Stockholm University

Host: Tamas Hausel

We show that bielliptic and Enriques surfaces over fields of positive characteristic do not admit non-trivial Fourier--Mukai partner. This is a joint work with K. Honigs and M. Lieblich. I will start by giving a very gentle introduction to derived categories and their use in algebraic geometry.

Thursday, May 23, 2019 01:30pm - 03:30pm

Big Seminar room Ground floor / Office Bldg West (I21.EG.101)
