Seminar/Talk

Neural Computations for Vision

Markus Meister

Caltech, Division of Biology and Biological Engineering

Host: Maximilian Jösch

The task of the visual system is to extract from the onslaught of raw image information (~1 Gbit/s) the little knowledge that really matters to us (~20 bit/s). I will discuss what we are learning about this process in the early neural circuits of the visual system, and how the resulting insights can help devise prostheses for the blind.

Thursday, June 13, 2019 11:00am - 12:00pm

Mondi Seminar Room 2, Central Building

This invitation is valid as a ticket for the ISTA Shuttle from and to Heiligenstadt Station. Please find a schedule of the ISTA Shuttle on our webpage: https://ista.ac.at/en/campus/how-to-get-here/ The ISTA Shuttle bus is marked ISTA Shuttle (#142) and has the Institute Logo printed on the side.
