

Seminar/Talk

Chaos and Order in Arithmetics and Dynamics

Alexander Gorodnik

University of Bristol

Host:

We discuss several basic number-theoretic problems such as, for instance, solving polynomial equations and finding best rational approximations. It is difficult and sometimes impossible to solve these problems explicitly, but it turns out that they are related to certain chaotic dynamical systems. We explain how to use these ideas to shed some light on statistical properties of solutions. In this talk we will take a journey through Number Theory, Statistical Physics, the Theory of Dynamical Systems and back.

Wednesday, January 11, 2017 10:00am - 11:00am

Mondi Seminar Room 2, Central Building

This invitation is valid as a ticket for the ISTA Shuttle from and to Heiligenstadt Station.

Please find a schedule of the ISTA Shuttle on our webpage:

<https://ista.ac.at/en/campus/how-to-get-here/> The ISTA Shuttle bus is marked ISTA Shuttle (#142) and has the Institute Logo printed on the side.
