

Seminar/Talk

Online Quantum Seminar with Sonika Johri

Sonika Johri

IonQ

Host: Maksym Serbyn

A variety of quantum computing platforms are rapidly becoming available for access over the cloud. These systems are characterized by a limited number of qubits and available computing time. Combined with innovative error mitigation techniques, these systems may soon begin to surpass classical computers in some application areas. In this talk, I will discuss recent demonstrations of current quantum computers in studying diverse problems in machine learning as well as condensed-matter physics.
