Green Labs Austria: A network supporting sustainable research

Logan Hodgskiss

University of Vienna

Host: IST Sustainability Group

Moving towards a sustainable future is a primary goal for humanity as we look towards the future. But how does this apply to laboratories, whose research is fundamental to understanding the world we live in, but who also produce a large amount of waste? Green Labs Austria is a non-profit organization that was founded to help address these concerns. Green Labs Austria aims to connect laboratories in Austria that share the vision of a more sustainable research. We want to change the status quo of resource management and offer guidelines for a transition to more environmentally aware research practices. We hope to achieve this by collaborating with groups and institutions from various disciplines and implementing lab practices that will help conserve resources. Specifically, we want to reform how labs and scientists think about energy consumption, plastic consumption, and recycling. For biologists and for scientists of all disciplines, sustainable research practices should represent a natural part of our daily work and our passion. Green Labs Austria hopes to connect people and ideas to help make this a reality.

Tuesday, July 6, 2021 04:00pm - 05:00pm

Online

This invitation is valid as a ticket for the ISTA Shuttle from and to Heiligenstadt Station. Please find a schedule of the ISTA Shuttle on our webpage: <https://ista.ac.at/en/campus/how-to-get-here/> The ISTA Shuttle bus is marked ISTA Shuttle (#142) and has the Institute Logo printed on the side.
