

Seminar/Talk

Mechanistic relationships in the TMEM16 family of calcium activated chloride channels

Raimund Dutzler

Dept. of Biochemistry, University of Zurich

Host: Gaia Novarino -in cooperation with the FWF-Doctoral Program

The TMEM16 proteins constitute a family of membrane proteins with an unusual functional breadth, which includes lipid scramblases and CI- channels. Both functional branches are activated by calcium, acting from the intracellular side, and they share a common architecture, which was defined by the structure of the lipid scramblase nhTMEM16 (1). In this protein, each subunit of the homo-dimeric protein encompasses ten transmembrane helices and structured cytosolic domains. The structural features of subunits suggest that the dimeric protein harbors two locations for catalysis that are independent with respect to activation and lipid conduction. In scramblases, the subunit cavity, a hydrophilic membranetraversing furrow contained within each subunit that is exposed to the lipid bilayer provides a path for polar lipid headgroups across the membrane. It contains a conserved Ca2+-binding site located within the hydrophobic core of the membrane, which regulates activation in both channels and scramblases. As shown by electrophysiology the ion channel TMEM16A contains two ion conduction pores that are independently activated by Ca2+ (2). The nhTMEM16 structure thus provides insight into functional mechanisms underlying lipid movement in scramblases and ion conduction in channels of the TMEM16 family. 1. J. D. Brunner, N. K. Lim, S. Friday, April 21, 2017 03:00pm - 05:00pm

Seminar room Big Ground floor / Office Bldg West (I21.EG.101)

This invitation is valid as a ticket for the ISTA Shuttle from and to Heiligenstadt Station. Please find a schedule of the ISTA Shuttle on our webpage: https://ista.ac.at/en/campus/how-to-get-here/ The ISTA Shuttle bus is marked ISTA Shuttle (#142) and has the Institute Logo printed on the side. www.ista.ac.at | Institute of Science and Technology Austria | Am Campus 1 | 3400 Klosterneuburg
