

Seminar/Talk

On the persistence of periodic tori for symplectic twist maps

Alfonso Sorrentino

University of Rome Tor Vergata

Host: Vadim Kaloshin

In this talk I shall discuss the persistence of Lagrangian periodic tori for symplectic twist maps of the $2d$ -dimensional annulus and the rigidity of completely integrable maps. This is based on a joint work with Marie-Claude Arnaud and Jessica Elisa Massetti.

Monday, March 14, 2022 02:00pm - 03:00pm

IST Austria, Mondri 2

This invitation is valid as a ticket for the ISTA Shuttle from and to Heiligenstadt Station. Please find a schedule of the ISTA Shuttle on our webpage: <https://ista.ac.at/en/campus/how-to-get-here/> The ISTA Shuttle bus is marked ISTA Shuttle (#142) and has the Institute Logo printed on the side.
