

Seminar/Talk

Sex in the rockpools: uncovering the private life of seaweeds

Susana Coelho

Max Planck Institute for Biology Tübingen

Host: Beatriz Vicoso

The brown algae (brown seaweeds) are fascinating organisms that evolved complex multicellularity independently of animals and plants. Over the last few years, they have emerged as a highly valuable group to study the evolution of sex chromosomes and reproductive systems. I will describe how our lab has been using seaweeds to gain novel insights into the mechanisms and evolutionary trajectories of sex chromosomes and to reveal the functional and evolutionary interactions between the sex determination and key reproductive and life cycle traits.

Wednesday, April 26, 2023 12:30pm - 01:30pm

Cafeteria / O1 / Lakeside View (I22.O1.006)

This invitation is valid as a ticket for the ISTA Shuttle from and to Heiligenstadt Station.

Please find a schedule of the ISTA Shuttle on our webpage:

<https://ista.ac.at/en/campus/how-to-get-here/> The ISTA Shuttle bus is marked ISTA Shuttle (#142) and has the Institute Logo printed on the side.
