

Public outreach event

Knocking on Heaven's door

Lisa Randall

Harvard University

Host: Martin Hetzer and Heinz Faßmann

The latest developments in physics have the potential to radically revise our understanding of the world: its makeup, its evolution, and the fundamental forces that drive its operation. I will give an overview of current developments and describe the nature of scientific thinking, with emphasis on the role of scale. I will also discuss how experiments today are expanding the frontiers of knowledge.

Tuesday, May 2, 2023 06:00pm - 07:00pm
ÖAW - Festsaal

This invitation is valid as a ticket for the ISTA Shuttle from and to Heiligenstadt Station. Please find a schedule of the ISTA Shuttle on our webpage: <https://ista.ac.at/en/campus/how-to-get-here/> The ISTA Shuttle bus is marked ISTA Shuttle (#142) and has the Institute Logo printed on the side.
