

Seminar/Talk

Modeling the Navigational Circuitry of the Fly

Larry F. Abbott

Columbia University in the City of New York, Center for Theoretical Neuroscience

Host: Tim Vogels

Navigation requires orienting oneself relative to landmarks in the environment, evaluating relevant sensory data, remembering goals, and convert all this information into motor commands that direct locomotion. I will present models, highly constrained by connectomic, physiological and behavioral data, for how these functions are accomplished in the fly brain.

Tuesday, September 26, 2023 04:00pm - 05:00pm
Central Bldg / O1 / Mondi 2 (I01.O1.008)

This invitation is valid as a ticket for the ISTA Shuttle from and to Heiligenstadt Station. Please find a schedule of the ISTA Shuttle on our webpage: <https://ista.ac.at/en/campus/how-to-get-here/> The ISTA Shuttle bus is marked ISTA Shuttle (#142) and has the Institute Logo printed on the side.
