

Seminar/Talk

# Integrated spatial planning for Nature and People

**Piero Visconti**

IIASA

Host: ISTA Sustainability Group

The Biodiversity, Ecology, and Conservation (BEC) Group at IIASA develops and applies state-of-the-art ecological knowledge, methods, and tools to understand ecosystem functioning, biodiversity change, and feedbacks in coupled social-economic-ecological systems. We use this knowledge to develop management options to achieve biodiversity and sustainability goals. Pierre's Group focusses on three key topics: Ecological responses to natural and anthropogenic drivers of change, for example, land and water management and climate change. How to prioritize conservation efforts to maximize positive impacts at scales from local to global (e.g., habitat restoration and conservation, and species management plans). How species and ecosystems contribute to selected ecosystem services and human wellbeing.

**Tuesday, January 30, 2024 01:00pm - 02:00pm**

Mondi 1

This invitation is valid as a ticket for the ISTA Shuttle from and to Heiligenstadt Station.

Please find a schedule of the ISTA Shuttle on our webpage:

<https://ista.ac.at/en/campus/how-to-get-here/> The ISTA Shuttle bus is marked ISTA Shuttle (#142) and has the Institute Logo printed on the side.
