

Talk

Art-Inspired Curved Crease Origami Research

Klara Mundilova

EPFL

Host: Samara Ren

Curved crease origami transforms flat materials, like paper, into intricate three-dimensional structures by folding along curves. While this discipline is primarily driven by aesthetic exploration, the resulting shapes hold significant practical potential for creating functional, deployable structures that are cost-effective to manufacture. In this talk, I will discuss how the aesthetic qualities of curved crease origami inspire research into developable surfaces and their isometric deformations. Additionally, I will showcase examples of design software that enable the digital fabrication of these complex forms, facilitating their interdisciplinary exploration.

Thursday, November 7, 2024 10:00am - 11:00am

Central Bldg / O1 / Mondi 3

This invitation is valid as a ticket for the ISTA Shuttle from and to Heiligenstadt Station.

Please find a schedule of the ISTA Shuttle on our webpage:

<https://ista.ac.at/en/campus/how-to-get-here/> The ISTA Shuttle bus is marked ISTA Shuttle (#142) and has the Institute Logo printed on the side.
