

Colloquium

All about prime numbers

Roger Heath-Brown

Oxford University

Host: Tim Browning

Prime numbers - numbers like 2,3,5,7 or 53, which have no divisors - have been a source of fascination since the ancient Greeks. Although they lie primarily in the realm of the pure mathematician, they occur in the natural world, and are vital to modern life, being crucial to the security of internet banking. The talk will look at the history of prime numbers, their occurrence in the real world, and what mathematicians have to say about them.

Monday, April 29, 2019 04:00pm - 05:00pm

Raiffeisen Lecture Hall, Central Building
