TD Andrej Hurny: Identification and characterization of novel auxin-cytokinin cross-talk components

Andrej Hurny

Benková Group

Host:

The main theme of Andrej's thesis is the interaction between the plant hormones auxin and cytokinin, main antagonistic regulators of plant development and growth. Andrej has identified a novel component of auxin-cytokinin cross-talk, gene synergistically upregulated by both of them (SYAC1) and characterized its biological function as a regulator of cell wall polysaccharides secretion, which could be relevant for agricultural applications.

Wednesday, December 20, 2017 10:00am - 11:00am

Mondi Seminar Room 2, Central Building

This invitation is valid as a ticket for the ISTA Shuttle from and to Heiligenstadt Station.

Please find a schedule of the ISTA Shuttle on our webpage:

<https://ista.ac.at/en/campus/how-to-get-here/> The ISTA Shuttle bus is marked ISTA Shuttle (#142) and has the Institute Logo printed on the side.
